DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 6-15, 22, 23 and 44-67 are , drawn to a changeable lock assembly, classified in class 70, subclass 493.
- II. Claims 24, 25, 27 and 28 are, drawn to a method of reprogramming a lock, classified in class 70, subclass 383.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used with a materially different process, such as inserting the "third" user key in claim 24 without using a second user key.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant should also note that the drawings filed on May 04, 2005 do not comply with 37 CFR 1.121, since the drawings must be labeled as "Replacement Sheets".
